

Dentistry Reinvented: Craniofacial Pain Disorders

Specialty Doctors - Interesting Cases - Hands-on Demonstrations

Join us for a two-day conference introducing some of the newest innovations in Dentistry! Speakers will be sharing cases on TMJ disorder and its many comorbidities including movement disorders such as: Tourette's, Parkinson's, Dystonia, Torticollis etc., as well as facial asymmetry, cranial bone distortions, and much more!

Dr. Darick Nordstrom

Dr. Nordstrom is the originator of the ALF appliance which is becoming synonymous with powerful healing of cranial bone distortions. His ability to incorporate osteopathic principles into his diagnosis has allowed him to treat many more conditions than the average practitioner. Come learn from the man who started it all!

Dr. Jeffrey Brown

Dr. Brown is the protege of Dr. Brendan Stack- the father of TMJ treatment. He will present to you how to diagnose and treat real world cases that will help you to identify what is going on with your patients and bring your diagnostic skills to a whole new level. You will see the cases that he has treated and learn how to identify the TMD cases in your own practice!

Where: Olav Brunborgs Vei 4 1396 Billingstad, Norway

When: August 25-26th 2017

Tuition: 10,000 Krone (\$1,500 USD)
